2030 - Outgoing Payment Initiation (CASA)

Using this option, you can initiate an outgoing payment transaction for a CASA account. You enter details like nominee account number, payment type, amount to be remitted etc. and on successful completion of the transaction the system will generate a reference number. Using this reference number, the transaction can be authorised by using the **Outgoing Payment Transaction (Message)** (Fast Path: 2031) option.

Definition Prerequisites

- 8051 - CASA Account Opening
- PM002 - Payment Transaction Definition
- List of Payment Transaction Types
- Currency list – For entering Remit currency

Modes Available

Not Available

To initiate an outgoing payment transaction

1. Type the fast path **2030** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Remittance > Outgoing Payment Initiation (CASA)**.

2. The system displays the **Outgoing Paymnt Initiation (CASA)** screen.

6. Click the **OK** button.
7. The system displays the transaction sequence number. The transaction sequence number is a system generated number that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.

PM023 - Payment Transaction Authorization*

Using this option, you can further process an incoming rejected payment transaction. The records can be rejected due to any of the following reasons:

- Account Closed
- Account Blocked
- Account Name & Beneficiary Name not matching
- Invalid Account number
- Account Number not found
- TRN code and account number value does not match, etc

All such accounts will get into this exception processing option. You can modify the account number or the GL code for the rejected incoming transaction. If the account number is modified and a CASA account number is entered, then, on authorisation in the screen, **FLEXCUBE** will again perform all the account level validations on the modified account number. If the account fails any of the validations, transaction will again be rejected. The status of such transactions will be re-rejected. If a credit record is rejected from the exception queue it will go back as an outgoing payment in the next outgoing payment file. A debit note for bank charges cannot be rejected from the Exception queue. The reason for rejection of the transaction will be displayed in the Reason Code field in the screen. If the you wants to again reject the transaction from the

exception queue, a new reason code can be selected from the Reason Code drop down. All the rejected incoming payment transactions will be available in the exception queue for two days. If you do not take any action on the rejected items, records will be purged from the exception queue according to the purge policy.

Definition Prerequisites

- Branch list – For entering branch details
- List of users – For entering user details

Modes Available

2032 - SWIFT Outgoing Payment Message

Whenever customer requests for a SWIFT based outgoing fund transfer, the front office user will collect the basic details in **Outgoing Payment Initiation(CASA)** (Fast Path: 2030) or **Outgoing Payment Initiation - Against Cash** (Fast Path : 2042) or **Outgoing Payment Initiation - against GL** (Fast Path: 2041).

Using this option , the back office user will provide the necessary details and send the transaction to FCC for further processing. After successful validation in FCC, the SWIFT message for outgoing payment will be generated according to the contract provided by the FCR user and FCC reference number will be sent to FCR.

If the transaction is rejected by FCC, for validation reasons, the user can reinitiate the transaction from this option and modify the data if required and resend the same to FCC for further action. But if certain mandatory fields are incorrect, then the transaction has to be reversed through the EJ and a fresh transaction has to be initiated.

Definition Prerequisites

- 2030 - Outgoing Payment Initiation(CASA)
- 2041 - Outgoing Payment Initiation - against GL
- 2042 - Outgoing Payment Initiation - Against Cash

Modes Available

Not Applicable

To send a SWIFT outgoing payment message

1. Type the fast path **2032** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Remittance > SWIFT Outgoing Payment Message**.
2. The system displays the **SWIFT Outgoing Payment Message** screen.

Field Name	Description
Remitter Status	[Conditional, Pick List] Select the remitter status from the pick list. This field is enabled only for SWIFT type payments and is mandatory for SWIFT outgoing payments.
Remitter Category	[Conditional, Pick List] Select the remitter category from the pick list. This field is enabled only for SWIFT type payments and is mandatory for SWIFT outgoing payments.
3.	Enter the account number and press the <Tab> or <Enter> key.
4.	Enter the transaction amount.

SWIFT Outgoing Payment Message

The screenshot shows the 'SWIFT Outgoing Payment Message' form. A 'Microsoft Internet Explorer' dialog box is overlaid in the center, displaying a yellow warning icon and the text 'Successful SWIFT transaction message.' with an 'OK' button. The form fields are as follows:

- Remittance Date:** 28/02/2009
- Reference No.:** 9999409022800010
- Customer Details:**
 - Account No.:** 000000003418
 - Account Ccy:** IDR
 - Acct Ccy Rate:** 1.0
 - Payment Transaction Code:** OP_S_SHA
 - Service Charge Amount:** 0
 - Remit Amount:** 10,000
 - Account Amt:** 184,310,195.3100000
- Remitter Details:**
 - Ordering Customer:** 000000003418
 - Intermediary Institution:** SUNNY SERVICES
 - Mumbai:** [Empty]
- Beneficiary Details:**
 - Account With Institution (BIC Code):** AMEXUS16
 - Account With Inst. Details:** Bank Danamon
 - Remittance Information:** /INV/
- Other Transactions:** SW/CB
- Cost Rates Details:** [Empty]
- Remit Ccy:** GBP
- Txn Ccy Rate:** 18431.02
- Payment Type:** OP_SWIFT
- Charge Bearer:** SHA
- FCC Product Code:** FTDF
- Receiver Status:** IND
- Receiver Category:** 20
- Affiliation:** 3
- Transaction Purpose:** 33
- Sender to Receiver Information:** [Empty]
- Remitter Status:** AD
- Remitter Category:** 20

- Click the **Ok** button.
- The system displays the message "Authorisation Required. Do You Want to continue?". Click the **OK** button.
- The system displays the **Authorization Reason** screen.
- Enter the relevant information and click the **Grant** button.

9. The system displays the transaction sequence number. The transaction sequence number is system generated that uniquely identifies each transaction performed by a teller and can be used for tracking the transaction. Click the **Ok** button.
10. The system displays the **Documents** screen.
11. If you want to print the receipt, select the record that needs to be printed. The system displays the message "Do You Want To Print". Click the **Yes** button.
OR
Click the **Cancel** button.

PM026 - Incoming Payment Repair Queue

Using this option, you can process an incoming payment transaction. An incoming payment file is uploaded to the database for onward credit to the accounts/GL.

When the system is unable to process an Incoming Payment because the target credit account in the message does not exist in the system, it keeps such transactions aside, by posting them to a "Repair Queue", awaiting corrections to be made to the transaction.

The records can be rejected due to any of the following reasons:

- Account Closed
- Account Blocked
- Account Name and Beneficiary Name not matching
- Invalid Account number
- Account Number not found
- TRN code and account number value doesn't match, etc.

This process of manual correction of an Incoming Payment is called Repair. You can modify the account number or the GL code for the rejected incoming transaction. If the account number is modified and a CASA account number is input then, on authorization in the screen, **FLEXCUBE** will again perform all the account level validations on the modified account number. If the account fails any of the validations, transaction will again be rejected. The status of such transactions will be re-rejected.

Using this option incoming payment messages can be repaired or rejected. Repair of transactions can happen one at a time and it does not work for bulk messages.

Definition Prerequisites

- BA452 - File Upload (GEFU ++)

Modes Available

Field Description

Field Name	Description
Network Reference No	[Display] This column displays the network reference number generated at the time of payment initiation.
Pymt Txn Code	[Display] This column displays the payment transaction code.
Account No	[Display] This column displays the beneficiary account number.
New Account Number	[Optional, Alphanumeric,14] Type the new account number.
Account Title	[Display] This column displays the account title.
Benef Name	[Display] This column displays the name of the beneficiary.
Remittg bank	[Display] This column displays the remitting bank name.

Field Name	Description
Remittg Branch	[Display] This column displays the branch name of the remitting branch.
Amount	[Display] This column displays the amount of the payment transaction.

Details

This tab is for future use.

Field Name	Description
Details	
Network Reference No	[Display] This field displays the network reference number.
Branch Code	[Conditional, Numeric, Four] Type the branch code. This field is enabled if the GL account number is entered in the Account No field. For customer accounts this field displays the branch code for which the incoming payment transaction was initiated.
Account Details	
Account No	[Conditional, Numeric, 14] Type the account number to which the transaction is to be reposted. For the entered account number FLEXCUBE performs all the account level validations at the time of authorization. GL account can also be input in this field. This field is enabled if the Repost check box is selected.
Account Amount	[Display] This field displays the incoming payment amount which is to be credited to the account.
Customer IC	[Display] This field displays the unique customer identification number.
Account Currency Rate	[Display] This field displays the account currency rate. It is defaulted as one when the payment transaction is done in the local currency.
Receiver Name	[Display] This field displays the name of the receiver.

Field Name	Description
Account State	[Display] This field displays the account state.
Transaction Details	
Payment Type	[Display] This field displays the type of incoming payment transaction. For e.g. CP (Commission Payments), etc.
TRN Code	[Display] This field displays the transaction code.
Payment Transaction	[Display] This field displays the payment transaction type.
Transaction State	[Display] This field displays the state of the transaction. It indicates whether the transaction is in an Initiated state or a Transaction Entry Completed state.
Transaction Date	[Display] This field displays the transaction date for the incoming payment transaction.
Remit Amount	[Display] This field displays the amount of the payment transaction.
Remit Currency	[Display] This field displays the currency in which the amount is credited.
Remit Currency Rate	[Display] This field displays the rate at which currency is remitted. This field displays the value one by default if the account currency and the remit currency are the same.
Transaction Description	[Conditional, Alphanumeric, 120] Type the transaction description. This field is enabled if the Reject or Repost check box is selected.
Message State	[Display] This field displays the status of the message for an incoming payment transaction. For e.g. Message Sent, Message Received, etc.
CounterParty Details	

Field Name	Description
CounterParty Name	[Display] This field displays the CounterParty name.
CounterParty Bank Code	[Display] This field displays the code of the bank in which counterparty account is maintained.
CounterParty Bank	[Display] This field displays the name of the bank in which counterparty account is maintained.
Reject Code	[Conditional, Drop-Down] Select the reject code from the drop-down list. This field allows to select the reason for rejecting an incoming payment transaction. This field is enabled if the Reject check box is selected.
Error Description	[Display] This field displays the error description.
Reject	[Optional, Check Box] Select the Reject check box to reject the details of an incoming payment transaction.
Repost	[Optional, Check Box] Select the Repost check box to repost an incoming payment transaction.

6. To return the transaction, click the **Return** button.
7. The system displays the message "Transaction Returned Successfully". Click the **OK** button.
8. To repair the transaction, click the **Repair** button.
9. The system displays the message "Transaction Repaired Successfully". Click the **OK** button.

PM027 - Outgoing Payment Repair Queue

Using this option you can repair/reverse all the outgoing payment transactions which are authorized from the **Outgoing Payment Transaction (Message)** (Fast Path: 2031) option but before the extraction takes place.

Once the extract is generated and the transactions move to the respective folders in the RJSOUT area, no further repair/reversal is possible.

You can select one of the search criteria like branch code, User Id, Account no, payment type etc from the available options.

After selecting the transaction, if 'Reverse' is selected, **FLEXCUBE** will reverse both the accounting entries which are passed during the transaction initiation and the transaction authorization options. If 'Repair' is selected, then modifications in the transaction can be done for:

- TRN
- Routing Number

Definition Prerequisites

- 2031 - Outgoing Payment Transaction (Message)

Modes Available

Not Applicable

To view outgoing repair queue details

1. Type the fast path **PM027** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Payment Transactions > Outgoing Payment Repair Queue**.
2. The system displays the **Outgoing Payment Repair Queue** screen.

Field Description

Field Name	Description
Reference No	[Display] This field displays the reference number generated in Outgoing Payment Initiation (Fast Path: 2030) option.
Account Details	
Account No	[Display] This field displays the account number from which the outgoing payment transaction is initiated.

Field Name	Description
Account Amount	[Display] This field displays the payment transaction amount.
Account State	[Display] This field displays the account state i.e Debit or Credit.
Transaction Details	
Payment Transaction	[Display] This field displays the payment transaction type selected at the time of initiation.
Payment Package	[Display] This field displays the payment package.
Transaction Date	[Display] This field displays the payment transaction date.
TRN Code	[Conditional, Alphanumeric, Eight] Type the transaction code. The user can modify the transaction code value, if required by selecting the Repair check box. By default this field displays the TRN entered at the time of Outgoing Payment Transaction (Message) (Fast Path : 2031) option.
Remit Amount	[Display] This field displays the payment amount.
Remit Currency Rate	[Display] This field displays the remit currency rate.
Remit Currency	[Display] This field displays the remit currency.
LLD	[Display] This field displays the transaction initiator entered by the user at the time of authorisation in the Outgoing Payment Transaction (Message) (Fast Path:2031) option.
PTR	[Display] This field displays the settlement currency entered by the user at the time of authorisation in the Outgoing Payment Transaction (Message) (Fast Path:2031) option.
FEE	[Display] This field displays the value entered by the user at the time of authorisation in the Outgoing Payment Transaction (Message) (Fast Path:2031) option.

Field Name	Description
Narrative	[Display] This field displays the narration created at the time of payment initiation.
Beneficiary	
Account No	[Display] This field displays the beneficiary account number entered at the time of outgoing payment initiation.
Name	[Display] This field displays the beneficiary's name.
Routing Number	[Conditional, Numeric, Seven] Type the routing number of the beneficiary. By default the system displays the routing number entered at the time of payment initiation which can be modified by the user if required, by selecting the Repair check box. The system will validate against the routing numbers present in the bank branch directory.
Bank Code	[Display] This field displays the bank code entered at the time of payment initiation.
Branch Name	[Display] This field displays the branch name.
BI Code	[Display] This field displays the BI code entered at the time of payment initiation.
Bank Name	[Display] This field displays the bank name.
Remitter Details	
Remitter Name	[Display] This field displays the remitter name for the outgoing payment.
Remitter Phone No	[Display] This field displays the remitter phone number for the outgoing payment.
Remitter Nation Id	[Display] This field displays the remitter national ID for the outgoing payment.

Field Name	Description
Status	[Display] This field displays the error status in case the repair/reversal is not successful.
Repair	[Optional, Check Box] Select Repair checkbox to modify the details of an outgoing payment transaction. The user can modify the TRN and the routing number of the transaction.
Reverse	[Optional, Check Box] Select the checkbox to reverse an out going payment transaction. FLEXCUBE will reverse the customer entry and pass the following entry: Intermediary GL - Dr CASA/Cash/GL - Cr.

Select the ID of the user who initiated the payment transaction from the pick list.

Start Date

[Optional, Pick List, dd/mm/yyyy]

Select the date to view the payment transactions initiated on/after that day.

End Date

[Optional, Pick List, dd/mm/yyyy]

Select the date to view the payment transaction completed on/before that day from the pick list.

Field Name	Description
Payment Type	<p>[Optional, Drop-Down]</p> <p>Select the type of payment to view the accounts with that payment type from the drop-down list.</p> <p>The option are:</p> <ul style="list-style-type: none"> • Outgoing Payment • Reject of Incoming Payment • Incoming Payment • Reject of Outgoing Payment
Payment Transaction Code	<p>[Optional, Pick List]</p> <p>Select the payment transaction code from the pick list.</p>
Amount (Min)	<p>[Optional, Numeric, 13, Two]</p> <p>Type the minimum amount beyond which the payment transactions are to be enquired.</p> <p>By default, the system displays the value as 0.00.</p>
Amount (Max)	<p>[Optional, Numeric, 13, Two]</p> <p>Type the maximum amount upto which the payment transactions are to be enquired.</p> <p>By default, the system displays the value as 9,999,999,999.99</p>
Account Number	<p>[Optional, Numeric, 16]</p> <p>Type the account number if payment transactions related to specific account number is required.</p>
Network Id	<p>[Optional, Pick List]</p> <p>Select the network ID from the pick list.</p>
NEFT Reference Number	<p>[Optional, Numeric, 16]</p> <p>Type the NEFT reference number if the transaction to be enquired is for a specific reference number.</p>
IFSC Code	<p>[Optional, Alphanumeric, 11]</p> <p>Type the transaction reference number if the transaction to be enquired is for a specific reference number.</p>
Transaction Status	<p>[Optional, Drop-Down]</p> <p>Select the transaction status from the drop-down list.</p>
UTR Number	<p>[Optional, Numeric, 16]</p> <p>Type the UTR number if the transaction to be enquired is for a specific UTR number.</p>

Field Name**Description****CutOff Status**

[Optional, Drop-Down]

Select the cutoff status from the drop-down list.

The options are:

- All
- Pre CutOff
- Post CutOff

File Name

[Optional, Alphanumeric, 50, Pick List]

Type the file name or select the file name to view the particular transaction from the pick list.

3. Enter the relevant parameters.

PM010 - Mandate Revocation*

Mandate revocation allows the user to revoke and inquire upon the mandates revoked between the customer and the counterparty. Using this you can perform a revocation as well as do an inquiry on revoked mandates.

Definition Prerequisites

- PM019 - Counterparty Master Maintenance
- PM020 - Mandate Definition

Modes Available

Not Applicable

To view mandate revocation details

- Type the fast path **PM010** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Payment Transactions > Mandate Revocation**.
- The system displays the **Mandate Revocation** screen.

Mandate Revocation

Field Description

Field Name	Description
Customer ID	<p>[Mandatory, Pick List]</p> <p>Select the customer ID from the pick list.</p> <p>A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the Customer IC and Customer Category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.</p>
Customer Account No	<p>[Mandatory, Pick List]</p> <p>Select the account number from the pick list.</p> <p>For the customer account selected a valid mandate with a counterparty should be present for revocation.</p>

3. Select the customer Id and customer account number from the pick list.
4. Click the **Inquire** button.
5. The system displays the revoked mandate details in the **Mandates To Be Revoked** tab.

2035 - Domestic Outgoing Payment Initiation (Credit Card)

Using this option, domestic outgoing payment for credit cards can be initiated. The remit currency will be the local currency of the bank. The credit card details are validated by an external system for the Card **IBAN**³ number, balance etc.

Oracle FLEXCUBE validates through the external system interface with **FCC PE**⁴ to resolve the routing. If any network charges are applicable the same will also be included in the message. After the entries are posted, **Oracle FLEXCUBE** will send a positive response through the interface system to FCC PE to upload the payment. Remote authorization is required if the amount of payment is higher than the configurable amount.

Definition Prerequisites

- PM002 - Payments Transaction Definition
- SCM01 - SC Package Definition

Modes Available

Not Applicable

To initiate domestic outgoing payment through credit card

1. Type the fast path **2035** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Remittance > Domestic Outgoing Payment Initiation(Credit Card)**.
2. The system displays the **Domestic Outgoing Payment Initiation(Credit Card)** screen.

2037 - SEPA Outgoing Payment Initiation(Credit Card)

Using this option, **SEPA**⁵ outgoing payment for credit cards can be initiated. The system will select Euro as remit currency. The credit card details are validated by an external system for the Card **IBAN**⁶ number, balance, card status etc.

Oracle FLEXCUBE validates through the external system interface with **FCC PE**⁷ to resolve the routing. If any network charges are applicable the same will also be included in the message. After the entries are posted, **Oracle FLEXCUBE** will send a positive response through the interface system to FCC PE to upload the payment. Remote authorization is required if the amount of payment is higher than the configurable amount.

Definition Prerequisites

- PM002 - Payments Transaction Definition
- SCM01 - SC Package Definition

Modes Available

Not Applicable

To perform SEPA outgoing payment through credit cards

1. Type the fast path **2037** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > CASA Account Transactions > Remittance > SEPA Outgoing Payment Initiation(Credit Card)**.
2. The system displays the **SEPA Outgoing Payment Initiation(Credit Card)** screen.

Search Criteria	<p>[Conditional, Drop-Down]</p> <p>Select the search criteria from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Remit Account Number • UTR Number <p>This field is enabled if Modify and Delete options are selected from Action drop-down list.</p>
Search String	<p>[Conditional, Alphanumeric, 20, Pick List]</p> <p>Select the search string from the pick list.</p> <p>This field is enabled if Modify and Delete options are selected from Action drop-down list.</p>
Payment Transaction Code	<p>[Mandatory, Pick List]</p> <p>Select the payment transaction code from the pick list.</p> <p>These codes are defined in the Payment Transaction Definition (Fast Path : PM002) option. Transaction code will be defaulted to R41.</p>
Payment Type	<p>[Display]</p> <p>This field displays the payment type based on the payment transaction code selected in the corresponding field.</p>
User Reference Number	<p>[Optional, Alphanumeric, 40]</p> <p>Type the user reference number assigned to identify the transaction.</p> <p>Only / - ? : () , . ' + space special characters are allowed.</p>
Transaction Details	
Payment From	<p>[Mandatory, Drop-Down]</p> <p>Select the type of account from which the outgoing payment is to be initiated from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • CASA • GL
Sender's Transaction Branch	<p>[Mandatory, Pick List]</p> <p>Select the sender's transaction branch from the pick list.</p> <p>It is the branch which is originating the payment transaction in case it is different from the log in branch.</p>

Field Name	Description
CASA Account Number	<p>[Conditional, Numeric, 14]</p> <p>Type a valid CASA account number of the customer through which the outgoing payment transaction is initiated.</p> <p>This field is enabled if the CASA option is selected in the Payment From drop-down list.</p>
GL Account Number	<p>[Conditional, Numeric, Nine]</p> <p>Type a valid GL account number from where the payment has to be initiated.</p> <p>This field is enabled if the GL option is selected in the Payment From drop-down list.</p>
Account Currency	<p>[Display]</p> <p>This field displays the account currency.</p>
Cheque No	<p>[Optional, Numeric, 12]</p> <p>Type the cheque number.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: The system displays error messages for paid, stopped, and invalid cheques.</p> </div>
Cheque Date	<p>[Display]</p> <p>This field displays the cheque date present on the instrument .</p>
Remit Amount (4488)	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the amount that is to be remitted.</p> <p>The remit amount should be in range maintained in the Payment Transaction Attributes (Fast Path: PM039) option.</p>
Charges(LCY)	<p>[Display]</p> <p>This field displays the service charges to be applied in local currency.</p>
Net Amount(ACY)	<p>[Display]</p> <p>This field displays the net amount to be recovered from the customer on whose behalf an outgoing payment transaction is being initiated.</p> <p><i>Net Amount = Total of Payment Amount + Charges</i></p>
Amount in words	<p>[Display]</p> <p>This field displays the amount in words as entered in the Remit Amount field.</p>
Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the narrative.</p> <p>The system displays the default narration. You can change it, if required.</p>

3. Select the payment transaction code from the pick list.
4. Enter the relevant details in the transaction details section.

Note: At the time of Initiation proper funds management check will be done. If the funds are not sufficient then system displays a message "Account would overdraw ". Supervisor can authorise or reject the transaction. Transaction will not be completed if the reason cannot be overridden (e.g. account blocked) and supervisor will reject the transaction, else a prompt "All the reasons" will be displayed. If the supervisor selects Ok, the transaction will be marked for force debit and send to Authoriser (based on Authorisation Limits). In case of 'Cancel' the focus will move back to the transaction screen and the supervisor can choose to reject the transaction.

6. Click the **Ok** button.

Note: Concurrency Issue: If at the same time two users (teller and supervisor) trying to access the same transaction then whoever is first committed the transaction will be considered as final i.e. if authorizer has authorized the transaction then the same cannot be amended/canceled/ Modify / Delete by the teller, and a message "Transaction is already authorized, can't be modified or canceled" or vice versa will be displayed. If user has amended the transaction then a message will be shown to the authorizer on committing the transaction as "Transaction is already modified or deleted, can't be authorized".

7. The system displays the UTR number. Click the OK button.

2056 - RTGS - Bank Payment

RTGS is an RBI controlled interbank payment system where transactions of higher amounts are made. Using this option, outgoing payment transactions can be initiated through this payment network for bank's own transactions such as deployment of funds under treasury operations to other money market player or disbursement of high value loan amount to a beneficiary account maintained with the other banks.

Definition Prerequisites

- PM002 - Payments Transaction Definition

Modes Available

Not Available

To initiate RTGS bank payment

- Type the fast path **2056** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Payment Transactions > RTGS - Bank Payment**.
- The system displays the **RTGS - Bank Payment** screen.

RTGS - Bank Payment

The screenshot displays the 'RTGS-Bank Payment' application window. The interface includes a top header bar with the title 'RTGS-Bank Payment*'. Below the header, there are several input fields and sections:

- Action:** A dropdown menu set to 'Initiation'.
- Search Criteria:** A dropdown menu.
- Search String:** A text input field.
- Payment Transaction Code:** A dropdown menu set to 'R42'.
- Payment Type:** A dropdown menu set to 'OP'.
- User Reference Number:** A text input field.
- Related Reference Number (2006):** A text input field.
- Transaction Details:** A section containing:
 - Payment From:** A dropdown menu.
 - CASA Account Number:** A text input field.
 - Account Currency (4488):** A dropdown menu set to 'INR'.
 - Remit Amount (4488):** A text input field.
 - Amount in words:** A text input field.
 - Sender's Transaction Branch:** A dropdown menu set to '240'.
 - GL Account Number:** A text input field.
 - Cheque No.:** A text input field.
 - Cheque Date:** A date picker set to '28/02/2017'.
 - Charges (LCY):** A text input field.
 - Net Amount(ACY):** A text input field.
 - Payment Details/Narrative:** A dropdown menu set to 'RTGS'.
- Sender And Beneficiary Details:** A section with two main columns:
 - Ordering Institution:** A dropdown menu set to '5516'. Below it are fields for 'Ordering Institution IFSC (5517)', 'Bank Name', 'Branch Name', and 'Ordering Institution Details (5516)'.
 - Beneficiary Institution:** A dropdown menu set to '6521'. Below it are fields for 'Beneficiary ID', 'Beneficiary Institution IFSC Code (6521)', 'Code (5556)', 'Code Info', and 'Beneficiary Institution Details'.
 - Account with Institution:** A dropdown menu set to '6516'. Below it are fields for 'Account with Institution IFSC (6516)', 'Bank Name', and 'Branch Name'.
 - Sender to Receiver Information Code:** A dropdown menu set to 'FAST'. Below it are fields for 'Code Info', 'Additional Info 1', and 'Additional Info 2'.

At the bottom of the screen, there is a navigation bar with the following tabs: Card, Change Pin, **Cheque**, Cost Rate, Denomination, Instrument, Inventory, Pin Validation, **Service Charge**, Signature, and Travellers Cheque.

Payment From	<p>[Mandatory, Drop-Down]</p> <p>Select the type of account from which the outgoing payment is to be initiated from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • CASA • GL
Sender's Transaction Branch	<p>[Mandatory, Pick List]</p> <p>Select the transaction branch from the pick list.</p> <p>It is the branch which is originating the payment transaction in case it is different from the log in branch.</p>
CASA Account Number	<p>[Conditional, Numeric, 14]</p> <p>Type a valid CASA account number of the customer through which the outgoing payment transaction is initiated.</p> <p>The account title is displayed in the adjacent field.</p> <p>This field is enabled if the CASA option is selected in the Payment From drop-down list.</p>
GL Account Number	<p>[Conditional, Numeric, Nine]</p> <p>Type a valid GL account number from where the outgoing payment transaction has to be initiated.</p> <p>The GL code description is displayed in the adjacent field.</p> <p>This field is enabled if the GL option is selected in the Payment From drop-down list.</p>
Account Currency (4488)	<p>[Display]</p> <p>This field displays the account currency.</p>

Field Name	Description
Cheque No	<p>[Optional, Numeric, 12]</p> <p>Type the cheque number.</p> <p>Note: The system displays error messages for paid, stopped, and invalid cheques.</p>
Cheque Date	<p>[Display]</p> <p>This field displays the cheque date present on the instrument and normally be the date at which clearing process is run.</p>
Remit Amount (4488)	<p>[Mandatory, Numeric, 13, Two]</p> <p>Type the amount that is to be remitted.</p> <p>The remit amount should be in the range maintained in the Payment Transaction Attributes (Fast Path: PM039) option.</p>
Charges (LCY)	<p>[Display]</p> <p>This field displays the service charges applied in local currency.</p>
Net Amount (ACY)	<p>[Display]</p> <p>This field displays the net amount to be recovered from the customer who is initiating an outgoing payment transaction.</p> <p><i>Net Amount = Total of Account Amount + Charges</i></p>
Amount in words	<p>[Display]</p> <p>This field displays the amount in words as entered in the Remit Amount field.</p>
Payment Details/Narrative	<p>[Mandatory, Alphanumeric, 40]</p> <p>Type the payment/narrative details.</p> <p>By default, the system displays RTGS.</p>

3. Select the payment transaction code from the pick list.

4. Enter the relevant details in the transaction details.

Note: At the time of Initiation proper funds management check will be done. If the funds are not sufficient then system displays a message "Account would overdraw ". Supervisor can authorize or reject the transaction. Transaction will not be completed if the reason cannot be overridden (e.g. account blocked) and supervisor will reject the transaction, else a prompt "All the reasons" will be displayed. If the supervisor selects Ok, the transaction will be marked for force debit and send to Authoriser (based on Auth Limits). In case of 'Cancel' the focus will move back to the transaction screen and the supervisor can choose to reject the transaction.

2057 - NEFT - Outgoing Payment Initiation

NEFT is an interbank payment network regulated by RBI. This network is used for smaller amounts. Using this option you can initiate the outgoing payment transaction through NEFT payment network. The details such as IFSC code and sender's detail are required for the transaction.

Definition Prerequisites

- PM002 - Payments Transaction Definition

Modes Available

Not Available

To initiate NEFT outgoing payments

- Type the fast path **2057** and click **Go** or navigate through the menus to **Transaction Processing > Account Transactions > Payment Transactions > NEFT - Outgoing Payment Initiation**.
- The system displays the **NEFT - Outgoing Payment Initiation** screen.

Beneficiary Account Type (6310)	<p>[Optional, Drop-Down]</p> <p>Select the beneficiary account type from the pick list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • 10 - Savings Bank • 11 - Current Account • 12 - Overdraft • 13 - Cash Credit • 14 - Loan Account • 40 - NRE
Beneficiary Branch IFSC Code	<p>[Mandatory, Pick List]</p> <p>Select the beneficiary IFSC code from the pick list.</p> <p>System should not display own bank IFSC code in payment initiation screen.</p>
Bank Name	<p>[Display]</p> <p>This field displays the bank name based on the account with institution IFSC Code selected.</p>
Branch Name	<p>[Display]</p> <p>This field displays the branch name based on the account with institution IFSC Code selected.</p>

3. Select the payment transaction code from the pick list.

Note: At the time of Initiation proper funds management check will be done. If the funds are not sufficient then system displays a message "Account would overdraw ". Supervisor can authorize or reject the transaction. Transaction will not be completed if the reason cannot be overridden (e.g. account blocked) and supervisor will reject the transaction, else a prompt "All the reasons" will be displayed. If the supervisor selects Ok, the transaction will be marked for force debit and send to Authoriser (based on Auth Limits). In case of 'Cancel' the focus will move back to the transaction screen and the supervisor can choose to reject the transaction.

4. Select the type of account from the drop-down list.
5. Enter the other relevant transaction, sender bank and beneficiary details.

6. Click the **OK** button.

Note: Concurrency Issue: If at the same time two users (teller and supervisor) trying to access the same transaction then whoever is first committed the transaction will be considered as final i.e. if authorizer has authorized the transaction then the same cannot be amended/canceled/ Modify / Delete by the teller, and a message "Transaction is already authorized, can't be modified or canceled" or vice versa will be displayed. If user has amended the transaction then a message will be shown to the authorizer on committing the transaction as "Transaction is already modified or deleted, can't be authorized".

7. The system displays the NEFT Reference number. Click the **OK** button.

PM033 - RTGS-Outgoing Pymt Auth Screen

Outgoing payment transactions involve accessing secured networks and the payment is initiated after checking that fund transfer request is made by the authorized signatory of the account. Using this option you can authorize or reject the RTGS transactions initiated for the outgoing payments. It also allows you to authorize bulk transactions. Transactions will not be successfully executed if it is not duly authorized within the timeline window.

Definition Prerequisites

- 2056 - RTGS - Bank Payment
- 2055 - RTGS Outgoing Payment Initiation - Customer

Modes Available

Not Available

To authorize the RTGS outgoing payment transactions

1. Type the fast path **PM033** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Payment Transactions > RTGS-Outgoing Pymt Auth Screen.
2. The system displays the **RTGS-Outgoing Pymt Auth Screen**.

8. To reject the payment transaction, click the **Reject** button.
9. The system displays the message "Reject Operation Complete". Click the **Ok** button.
10. To release the payment transaction, click the **Release** button.
11. The system displays the message "Record Operation Complete". Click the **Ok** button.

PM035 - RTGS - Incoming Pymt Auth Screen

Using this option you can view all the incoming payment messages and authorize the transaction for credit to the customer's account. The message can be authorized in bulk by selecting all the transactions through the **Summary** tab.

Pending repair transactions can be repaired or returned in teller mode. If returned then new UTR number will be generated and the transaction will follow the normal outward flow. If repaired the status will be marked as "Semi authorized" and the transaction will not be available for authorization for the same level users.

Definition Prerequisites

Not Applicable

Modes Available

Not Available

To authorize the incoming payment transactions

1. Type the fast path **PM035** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Payment Transactions > RTGS - Incoming Pymt Auth Screen.
2. The system displays the **RTGS - Incoming Pymt Auth Screen** screen.

RTGS - Incoming Pymt Auth Screen

6. To repair the incoming payment transaction for invalid accounts, click the **Repair** button.
7. To return the incoming payment transaction, click the **Return** button. The system displays the message "Return Operation Complete". Click the **Ok** button.
8. To authorize the incoming payment transaction, click the **Authorize** button. The system displays the message "Transaction Authorized". Click the **Ok** button.

Note: If clicking on 'Authorize' button overrides conditions (e.g. High level Memo present on account, Account status Dormant, Account status Dormant and credit block with override, Account status Credit block with override or Account status Credit block) is present a respective override message is displayed. If user clicks on "OK" button then the transaction will be overridden and committed and "Cancel" button then the transaction will not be overridden and has to return the transaction through Return button in the screen. For reject reason the system will display the reject reason and then force the authorizer to return the transaction.

9. Once the transaction has been authorized the system fetches the next record for authorisation. After last transaction system displays a message "No more records pending".

PM036 - RTGS - Incoming Payment For Semi Authorized

This screen will be used for authorizing semi authorized transactions only. Access right of this screen will be given to the supervisors only.

If authorized by the concerned authoriser then the transaction will be marked as "Completed".

If returned the semi authorized transactions by using this screen then new RTGS reference number will be generated and then the transaction will follow the normal outward flow. Whether these returned incoming transactions will require single or dual or no authorization will depend on the payment transaction code defined for the for return of incoming transactions in PM002 -

Payments Transaction Definition screen and auth limit set for this payment codes in PM039 - Payment Transaction Attributes screen.

Example:

Suppose for return of R41I-RTGS Customer incoming transactions, a new payment code R41IR is defined in PM002 and similarly the payment transaction attributes (such as auth limits) are defined in PM039. While returning the R41I transactions FC will take into consideration the values set for R41IR in the PM039 screen to determine whether these returned transactions will require single authorization or double or no authorization.

Definition Prerequisites

- PM002 - Payments Transaction Definition
- PM035 - RTGS Incoming Pymt Auth Screen
- PM039 - Payment Transaction Attributes

Modes Available

Not Available

To authorize the incoming payment transactions

1. Type the fast path **PM036** and click **Go** or navigate through the menus to Transaction Processing > Payment Transactions > RTGS - Incoming Pymt Auth Screen.
2. The system displays the **RTGS - Incoming Payment For Semi Authorized** screen.

6. To repair the incoming payment transaction for invalid accounts, click the **Repair** button.
7. To return the incoming payment transaction, click the **Return** button. The system displays the message "Return Operation Complete". Click the **Ok** button.
8. To authorize the incoming payment of semi authorised transaction, click the **Authorize** button. The system displays the message "Transaction Authorized". Click the **Ok** button.

Note: If during authorization of semi authorized transactions a new override reason has been occurred. Click the authorize button, a respective override message is displayed with 'Ok' and 'Cancel' button. Click the Ok button, transaction will be overridden and marked as 'completed', click "Cancel" button, the transaction will not be overridden and later on if the user wants then he can have again take a decision to override or return the same transaction .

9. Once the transaction has been authorized the system fetches the next record for authorisation. After last transaction system displays a message "No more records pending".

PM043 - NEFT-Outgoing Pymt Auth Screen

Outgoing payment transactions involve accessing secured networks and the payment is initiated after checking that fund transfer request is made by the authorized signatory of the account. Using this option you can authorize or reject the transaction initiated for the outgoing payments. It also allows you to authorize bulk transactions. Transactions will not be successfully executed if it is not duly authorized within the timeline window.

Definition Prerequisites

- 2057 - NEFT Outgoing Payment Initiation

Modes Available

Not Available

To authorize the NEFT outgoing payment transactions

1. Type the fast path **PM043** and click **Go** or navigate through the menus to Transaction Processing > Account Transactions > Payment Transactions > NEFT-Outgoing Pymt Auth Screen.
2. The system displays the **NEFT-Outgoing Pymt Auth Screen**.

NEFT-Outgoing Pymt Auth Screen

Field Description

Field Name	Description
Branch Code	<p>[Mandatory, Pick List]</p> <p>Select the branch code from the pick list.</p> <p>These codes are defined in the Branch Master Maintenance (Fast Path : BAM03) option.</p> <p>By default the system displays the branch code in which teller has logged in.</p> <p>Branch code can be changed by the user any time.</p>
User Id	<p>[Optional, Pick List]</p> <p>Select the user id whose transactions need to be authorized, from the pick list.</p>

Field Name	Description
Account No	<p>[Optional, Numeric, 14]</p> <p>Type a valid CASA account number of the customer for whom the outgoing payment transaction is initiated.</p>
Network ID	<p>[Display]</p> <p>This field displays the network id as NEFT.</p>
Payment Type	<p>[Optional, Drop-Down]</p> <p>Select the payment type from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Outgoing Payment • Reject of Incoming Payment
Payment Transaction Code	<p>[Optional, Pick List]</p> <p>Select the payment transaction code associated with the transaction from the pick list.</p> <p>These codes are defined in the Payment Transaction Definition (Fast Path : PM002) option.</p>
Minimum Amount	<p>[Optional, Numeric, 13, Two]</p> <p>Type the minimum amount above which you want to view unauthorized transactions.</p>
Maximum Amount	<p>[Optional, Numeric, 13, Two]</p> <p>Type the maximum amount till which the unauthorized transactions need to be viewed.</p>
Start Date	<p>[Display]</p> <p>This field displays the start date.</p> <p>[Optional, Pick list, HH:MM:SS]</p> <p>Select the start time which is the latest timestamp updated in the system at the time of repair from the pick list.</p> <p>The start time can be changed the time as the user need to filter according to the requirement.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Note: The time stamp has various cases like Inputting, Modification , Authorization at 1st, 2nd level, Release, Sent to PI, Acknowledgement, settled/canceled, returned.</p> </div>
End Date	<p>[Display]</p> <p>This field displays the end date</p> <p>[Optional, Pick list, HH:MM:SS]</p> <p>Select the end time from the pick list.</p> <p>The end time can be changed the time as the user need to filter according to the requirement.</p>

Field Name	Description
Transaction Status	<p>[Optional, Drop-Down]</p> <p>Select the transaction status from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • Initiated • Semi-Authorized
File Name	<p>[Optional, Alphanumeric, 50, Pick List]</p> <p>Type the file name or select it from the pick list.</p>
Beneficiary Bank IFSC	<p>[Optional, Alphanumeric, 11, Pick List]</p> <p>Type the IFSC¹⁸ of the beneficiary or select it from the pick list.</p>
Customer Id	<p>[Optional, Numeric, 10]</p> <p>Type the id of the customer whose outgoing payment transactions are to be authorised.</p>
NEFT Reference No	<p>[Optional, Numeric, 16]</p> <p>Type the NEFT reference number.</p>
CutOff Status	<p>[Optional, Drop-Down]</p> <p>Select the cut off status from the drop-down list.</p> <p>The options are:</p> <ul style="list-style-type: none"> • All • Pre-CutOff • Post-CutOff

3. Select the branch code from the pick list.

4. Enter the other relevant information.

Field Description

Column Name

Description

Select All

[Optional, Check Box]

Select the check box if you want to authorise or reject all the fetched transactions.

This field is enabled if, the file pending for authorisation is selected from the field **File Name**.

Number Of Records

[Display]

This field displays the total count of the records under a selection.

Network Ref No

[Display]

This column displays the network reference number generated at the time of payment initiation.

In case of RTGS, it is the UTR number and in case of NEFT, it is the transaction reference number.

Pymt Txn Code

[Display]

This column displays the payment transaction code.

Account No

[Display]

This column displays the CASA or GL account number from which the payment transaction is initiated.

Column Name	Description
Account Title	[Display] This column displays the account title.
Initiation Date	[Display] This column displays the initiation date of the transaction.
Posting Date	[Display] This column displays the posting date.
Value Date	[Display] This column displays the value date of the transaction.
Benef Name	[Display] This column displays the name of the beneficiary.
Cr Account No	[Display] This column displays the account number of the beneficiary account to which the credit is given.
User ID	[Display] This column displays the user Id who has initiated the transaction.
Amount	[Display] This column displays the amount of the payment transaction.
Status	[Display] This field column displays the status of the payment transaction.
Post CutOff Transaction	[Display] This column displays the post cutoff transaction.
User Id	[Display] This column displays the user id whose transactions need to be authorized, from the pick list.

Column Name	Description
Reject Code	[Optional, Drop-Down] Select the reject code from the drop-down list. The reject codes are maintained in the Reason Code Maintenance (Fast Path: BAM40) option.
Reject Description	[Optional, Alphanumeric,150] Type the description for rejecting the transaction.

7. Select the **Select All** check box to reject or authorize all the transactions.
OR
Double-click a record to view its details. The system enables the relevant tab.

Note: The flow of payment transaction will be- At the time of Initiation proper funds management check will be done. If the funds are not sufficient then system displays a message "Account would overdraw ". Supervisor can authorise or reject the transaction. Transaction will not be completed if the reason cannot be overridden (e.g. account blocked) and supervisor will reject the transaction, else a prompt "All the reasons" will be displayed. If the supervisor selects Ok, the transaction will be marked for force debit and send to Authoriser (based on Authorisation Limits). In case of 'Cancel' the focus will move back to the transaction screen and the supervisor can choose to reject the transaction.

Field Description

Field Name	Description
Payment Transaction Code	[Display] This field displays the transaction code of the selected payment.
Payment Type	[Display] This field displays the payment type.
NEFT Reference Number	[Display] This field displays the NEFT reference number of the selected transaction.
User Reference Number	[Display] This field displays the user reference number of the selected transaction.
Transaction Details	
Payment from	[Display] This field displays the mode of payment transaction.

Field Name	Description
Sender's Transaction Branch	[Display] This field displays the sender's transaction branch.
CASA Account Number	[Display] This field displays the CASA account number of the customer for which the incoming payment transaction is initiated.
GL Account Number	[Display] This field displays the GL account number for which the incoming payment transaction is initiated.
Joint Holder Name	[Display] This field displays the joint holder's name.
Account Type	[Display] This field displays the account type.
Currency	[Display] This field displays the account currency.
Remit Amount	[Display] This field displays the remit amount.
Charges (LCY)	[Display] This field displays the service charges to be applied in local currency.
Net Amount (ACY)	[Display] This field displays the net amount to be provided to the customer initiating an incoming payment transaction.
Narrative	[Display] This field display the narration.
Remitter Name	[Display] This field displays the remitter name.
Batch Time	[Display] This field display the batch time and validate against the batch time window.
<div>Note: If the window has been exceeded then the transaction will be displayed to the user but he will be unable to return it. In case validation fails the system displays an error message.</div>	
Transaction Status	[Display] This field display the current status (at the time of inquiry) of a transaction .

Field Name	Description
Beneficiary Customer Name (6081)	[Display] This field displays the name of the beneficiary.
Transaction Posting Date	[Display] This field displays the transaction posting date.
Transaction Value Date	[Display] This field displays the transaction value date.
Return Code	[Optional, Drop-Down] Select the return code from the drop-down list.
Authorization Reasons	[Display] This field displays the authorization reason.
Reason Code	[Display] This field displays the reason code. [Optional, Drop-Down] Select the reason code from the drop-down list.
Reason Description	[Display] This field displays the description of the reason code.
Sender Bank Details	
Sending Branch IFSC Code (5756)	[Display] This field displays the sending branch IFSC code.
Originator of Remittance (7002)	[Display] This field displays the originator of remittance.
Bank Name	[Display] This field displays the bank name based on the IFSC Code selected.
Branch Name	[Display] This field displays the branch name based on the IFSC Code selected.
Sender to Receiver Information (7495)	[Display] This field displays the sender to receiver information.
<div>Note: For beneficiary account as NRE account if remit account type code is 40 then the payment transaction would be STP and if other than 40 then it would get tanked. For beneficiary account as NON NRE account then irrespective of whether remit account type code is 40 or not, transaction would be STP.</div>	

Field Name	Description
Beneficiary Details	
Beneficiary ID	[Displays] This field displays the beneficiary ID.
Beneficiary Account Number (6061)	[Displays] This field displays the beneficiary customer account number.
Beneficiary Account Type (6310)	[Display] This field displays the beneficiary account type.
Beneficiary Customer Address (5565)	[Display] This field displays the address of the beneficiary customer.
Beneficiary IFSC Code	[Display] This field displays the IFSC Code of the beneficiary customer.
Bank Name	[Display] This field displays the bank name based on the IFSC Code selected.
Branch Name	[Display] This field displays the branch name based on the IFSC Code selected.

7. To repair the incoming payment transaction, click the **Repair** button. The authorization button will be disabled on every successful authorization of repaired transactions.
8. To return the incoming payment transaction, click the **Return** button. The system displays the message "Return Operation Complete". Click the **Ok** button.
9. To authorize the incoming payment transaction, click the **Authorize** button. The system displays the message "Transaction Authorized". Click the **Ok** button.

Note: If clicking on 'Authorize' button overrides conditions (e.g. High level Memo present on account, Account status Dormant, Account status Dormant and credit block with override, Account status Credit block with override or Account status Credit block) is present a respective override message is displayed. If user clicks on "OK" button then the transaction will be overridden and committed and "Cancel" button then the transaction will not be overridden and has to return the transaction through Return button in the screen. For reject reason the system will display the reject reason and then force the authorizer to return the transaction.

10. Once the transaction has been authorized the system fetches the next record for authorisation. After last transaction system displays a message "No more records pending".

PM046- NEFT - Incoming Payment For Semi Authorized

This screen is used for authorising semi-authorised transaction. Access right of this screen be given to the supervisors only.

If returned the semi authorized transactions by using this screen then new RTGS reference number will be generated and then the transaction will follow the normal outward flow. Whether these returned incoming transactions will require single or dual or no authorization will depend on the payment transaction code defined for the for return of incoming transactions in PM002 - Payments Transaction Definition screen and auth limit set for this payment codes in PM039 - Payment Transaction Attributes screen.

Example: Suppose for return of N02 NEFT incoming transactions, a payment code N07 is defined in PM002 and similarly the payment transaction attributes (such as auth limits) are defined in PM039. While returning the N02 transactions FC will take into consideration the values set for N07 in the PM039 screen to determine whether these returned transactions will require single authorization or double or no authorization.

Definition Prerequisites

- PM002 - Payments Transaction Definition
- PM039 - Payment Transaction Attributes
- PM045 - NEFT - Incoming Pymt Auth Screen

Modes Available

Not Applicable

To authorize the incoming payment for semi authorised transactions

1. Type the fast path **PM046** and click **Go** or navigate through the menus to Transaction Processing > Payment Transactions > NEFT - Incoming Pymt For Semi Authorized.
2. The system displays the **NEFT - Incoming Payment For Semi Authorized** screen.
